Re: RoHS Certification

Dear Valued Customer,

This Certification is submitted as evidence of our commitment to product safety and legal compliance as applicable to homogeneous materials.

Regarding the European Union (EU) Directive 2011/65/EU of the European Parliament and of the Council (amended several times) on the restriction of the use of certain hazardous substances in electrical and electronic equipment, we submit to you that Texarkana Aluminum's coils do not exceed the below maximum concentration levels by weight in homogeneous materials:

- Lead(0.1 %);
- Mercury (0.1 %);
- Cadmium (0.01 %);
- Hexavalent chromium (0.1 %);
- Polybrominated biphenyls (PBB) (0.1 %);
- Polybrominated diphenyl ethers (PBDE) (0.1 %);
- Bis(2-ethylhexyl) phthalate (DEHP) (0.1 %);
- Butyl benzyl phthalate (BBP) (0.1 %);
- Dibutyl phthalate (DBP) (0.1 %); and
- Diisobutyl phthalate (DIBP) (0.1 %).

As per the referenced directive, 'homogeneous material' means one material of uniform composition throughout or a material, consisting of a combination of materials, that cannot be disjointed or separated into different materials by mechanical actions such as unscrewing, cutting, crushing, grinding and abrasive processes.

TKA does not have a RoHS 3 compliance letter. RoHS 3, adds four new restricted substances - all phthalates. The four phthalates are listed in TKA RoHS and REACH compliance letters and in the REACH.

Please advise if you have any questions or concerns.

Respectfully,

Donna Compton
Laboratory Manager
Texarkana Aluminum
